# Poster contributions

- **Pantelis Hadjipantelis**, "Functional phylogenetic Gaussian process regression"

- **Sophie Dabo**, "Classification and change points detection in functional data"

- **Michelle Carey**, "A generalised smoother for linear ODEs"

- **Manuel Oviedo de la Fuente**, "Functional response models in R"

- **Haochang Shou**, "Structured functional principal components analysis"

- **Shahin Tavakoli,** "On mixing conditions for asymptotics in functional time series"

- **Jona Cederbaum**, "Functional linear mixed models for sparsely or irregularly sampled data"

- **AhYeon Park**, "Principal fitted components for functional regression"

- **José Luis Torrecilla**, "Variable selection for classification of functional data"

- **Javier Gonzalez**, "Estimating structured networks using iterative l1-penalty approaches"

- **Rachid Ali Radi**, "Extraction semantic data in multimedia"
